CHRIS ULLMANN

From Air Force Flight Lines to Fortune 500 AI Transformation

I've spent 25 years doing the same thing in different wrappers: walking into systems that aren't working, engineering the fix, and getting people to actually use it. That started as an Air Force aerospace technician learning discipline, systems thinking, and how to keep mission-critical equipment running. It evolved into FDA compliance turnarounds, a \$49M enterprise transformation, and now hands-on AI development. The throughline is the point. The numbers tell the story.

EXPERIENCE

The Estee Lauder Companies
